

Spring 2003

HSHM 215b/ HIST 240b PUBLIC HEALTH IN AMERICA 1793-2000

TbTh 9.30-10.20

Naomi Rogers

Office: 316 WLH naomi.rogers@yale.edu

A lecture course surveying public health (broadly defined) in America from the yellow fever epidemic of 1793 to AIDS, breast cancer activism and bio-terrorism. With a focus on medicine and the state, topics will include quarantining and controlling disease, social welfare failures and successes, the experiences of healers and patients, and organized medicine and its critics.

Required Readings:

- * Gerald N. Grob The Deadly Truth: A History of Disease in America (Harvard University Press)
- * Allison L. Hepler Women in Labor: Mothers, Medicine, and Occupational Health in the United States 1890-1980 (Ohio State University Press)
- * Alan M. Kraut Silent Travelers: Germs, Genes and the "Immigrant Menace" (Johns Hopkins University Press)
- * Reading packet

Books are available at Book Haven, and on reserve at CCL.
The reading packet is at York Copy Center.
